

## CallTower® Office Communications Server 2007

Office Communications Server 2007 delivers streamlined Communications for your users so they can find and communicate with the right person, right now, from the applications they use most (like Microsoft Outlook and the Business Telephone). Without expensive upgrades, you can deliver streamlined communications, including telephone and voice-mail, web conferencing, enterprise instant messaging while maintaining the operational focus required to compete in business today.

Presence Information enables users to quickly identify the availability of their contacts to help insure maximum communication efficiency and productivity

### Streamlined Communications

Office Communications Server 2007 delivers the next generation of streamlined communications for your users so they can find and communicate with the right person, right now from the applications they use most (like Office Outlook and the Telephone).

- Click to Communicate within Office Outlook and the applications you use most.

Whether making a phone call right from Outlook or identifying the availability of a business document's author, users can find who they need and communicate using the most effective method

- Work Together in Real-Time in the Office and on the Road

Office Communications Server 2007 helps to improve your users ability to communicate when you need it from multiple devices and wherever they are, using just an Internet connection with no requirement for a VPN (Virtual Private Network)

- Communicate With Clients and Prospects More Efficiently

Web Conferencing, Audio Conferencing and improved calling capabilities allow for more efficient and improved communications with current and future customers

This web meeting shows the meeting experience with audio, video and web presentation using CallTower's OnDemand OCS Based LiveMeeting Service
