

# VONEXUS Enterprise Interaction Center™

## for Enterprise IP Telephony

**Application-rich IP PBX communications.**  
From an intelligent **all-in-one** platform

**VONEXUS Enterprise Interaction Center** (Vonexus EIC) provides IP telephony functionality for organizations from 100 to 1,500 users – in the office as well as away from it. But unlike traditional PBX phone systems that are good for dial tone and not much else, Vonexus EIC is a complete IP PBX application suite for IP-based voice and data *business communications*.

Pre-integrated, pre-packaged out of the box, ready to unify your enterprise. Vonexus EIC lets you keep up with customer demands, and stay ahead of the businesses you compete with on a daily basis.

**Reduce costs** by replacing expensive legacy multi-point hardware systems with the Vonexus EIC suite

**Simplify deployment** with auto-provisioning for phones, automated e-mail routing options, and a Report Assistant to simplify reporting

**Centralize administration** with a single intuitive interface to configure and maintain the Vonexus EIC system

**Improve productivity** and collaboration with desktop call controls, unified messaging, mobile access, real-time presence management, and more

**Empower your mobile workforce** with one number Find-me/Follow-me, anywhere access to voice, fax, and e-mail data, and with voice access to e-mails, Microsoft® Outlook® calendars and personal contacts

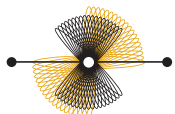

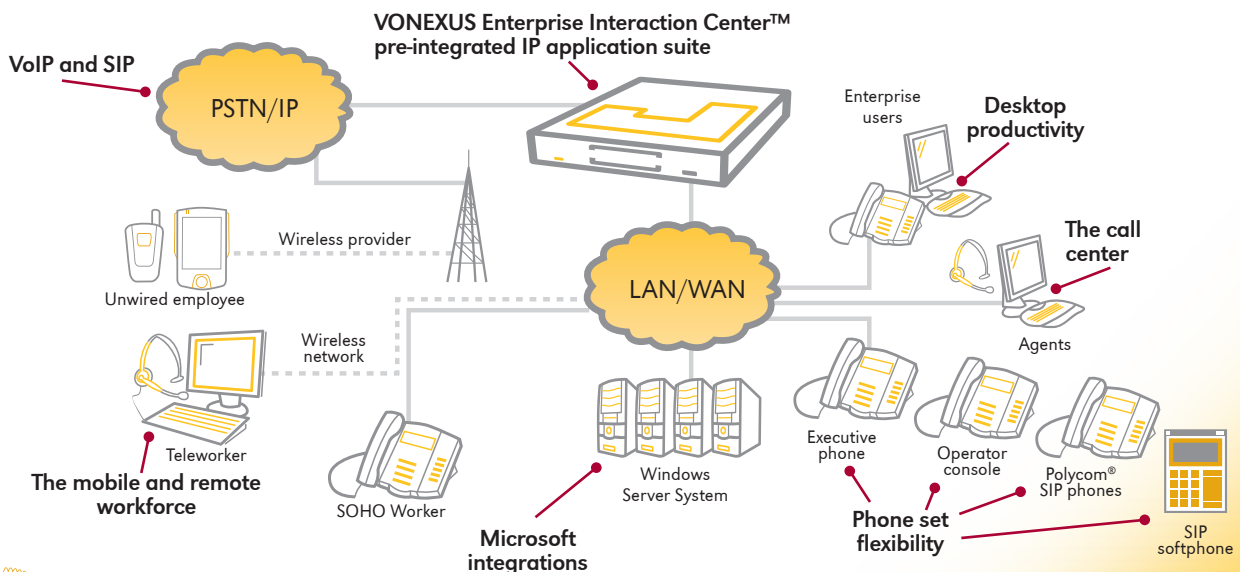

**Enhance customer service** by offering the multimedia contact options your customers want, and with multimedia ACD and auto attendant

**Easily move to VoIP** with Vonexus EIC's single SIP-architected platform, gateways, and media server packaged with a SIP proxy

**Increase security** by supporting Secure Real-time Transport Protocol (SRTP) and Transport Layer Security (TLS) to encrypt audio and call control info.

**Enjoy broader integration** to third-party networking equipment, end-user devices, and Microsoft applications via pre-integrated plug-ins

Leverage Vonexus EIC's unique open platform to adapt to virtually any IT infrastructure, including SIP-supported networks and multi-site configurations.

## Better business communications

The feature set in VONEXUS *Enterprise Interaction Center* is built on Interactive Intelligence's core Interaction Center Platform® — a single, multi-channel event-processing software platform built from the ground up to do everything a business communications solution should do.

### Scalability

100-1,500 business users • 3-50 ACD agents

### Enterprise-wide

#### IP PBX call processing

Configurable dial plan and Direct Inward Dial (DID) number routing

#### Full-featured operator console

Rapid transfers, speed dial pages, quick keys, directory tool bar, more

#### Complete desktop phone features

Hold, transfer, park, page, Caller ID, call and message waiting, etc.

#### Enhanced desktop Client features

- SIP softphone
- Real-time presence management
- On-demand call recording and monitoring
- Multi-party conferencing up to 96 parties
- Corporate and workgroup directories and speed dials

#### Embedded call controls for the Microsoft environment

Toolbar plug-ins for Outlook, Dynamics™ GP and CRM, and the Windows® desktop

- Screen pop for Outlook Contact and Journal entries, Dynamics GP and CRM
- IVR-based data access for Dynamics GP and CRM
- Remote call control integration for Live Communications Server and Office Communications Server

#### Messaging

- Voice mail only, or full unified messaging
- Add desktop faxing via Fax Server licensing

#### Multi-lingual support

English, Spanish, French, German, Japanese and other languages

#### Reporting

More than 100 standard reports, including call detail reporting, end-to-end reporting, and ad-hoc custom reporting

#### Built-in Account Code support

For the Vonexus EIC for .NET Client; for calls and faxes, including summary reports

### Informal call center features

#### Automatic call distributor (ACD)

Multimedia queuing, e-mail routing

#### Web services • Internet chat server

Web chat, including chat mail, chat recording, chat transfer
