CBEYOND®

BeyondVoice™ with SIPconnect

Cbeyond and Switchvox™, two leaders in IP telephony, seamlessly provide a feature-rich communications solution – at a fraction of the cost of traditional systems. Certified for compatibility with Cbeyond’s BeyondVoice with SIPconnect service, Switchvox SMB is an affordable software-based business phone system that is easy to set up and easy to maintain.

Small- and medium-sized businesses have communications requirements that can be just as demanding as a large organization. In fact, they often have unique needs because every member of a smaller organization is vital, and often performs many roles – requiring more freedom and flexibility. That’s why you need a communications solution that adapts to your dynamic enterprise. A solution that allows you to focus on what’s really important – getting business done.

Switchvox SMB is a complete business phone system in software, which means you can say goodbye to the monolithic PBX of the past. Now you have the freedom to grow from a single office to a global network without breaking the bank. And because Switchvox systems are compatible with today’s high-speed data networks and traditional telephony infrastructure, you can change at your own pace.

Switchvox SMB Features Include:

Unlimited extensions	Dial-by-name directory
Unlimited IVRs (auto-attendants)	Call parking
Unlimited call queues	Do not disturb
Simultaneous ring	Blind and assisted transfer
Virtual extensions	Call logging, reporting and graphs
Find me, Follow me	Meet-me conference center
Softphone and VoIP handset support	Outlook integration
Analog telephone adapter support	Click-to-Call (Firefox)
VoIP, PSTN and T-1 support	APIs for custom integration
Blind and assisted transfer	Call recording
Least cost routing	Live call monitoring
Restricted calling extensions	Call pickup
Flexible voicemail access	Switchboard, real-time operator panel
Voicemail to email	Extension groups
Custom “on hold” music	Log in queue agents
Time-based call routing	Unlimited paging extensions
Online admin management	Unlimited intercom extensions
Online user tools	
Custom greetings	

Switchvox SMB IP PBX

“Switchvox has been an exceptional product for us, meeting not just the needs we had identified ahead of time, such as call queuing and advanced IVRs, but also those we came across along the way, such as the need for real-time failover between multiple PBX units.

The Switchvox system is working extremely well and we are very happy with the quality of the product and service. Switchvox is an exceptional product backed by a world-class organization and we’re thrilled to be a customer.”
