

WHY THE 3COM IP PBX

FULLY SIP COMPLIANT: 3Com supports SIP trunking, telephones and SIP applications TODAY. Today, SIP is the standard for IP communications and your new PBX must be fully SIP-compatible. From day one, 3Com has been a standards-based PBX.

WIDEBAND AUDIO: 3Com's telephones use the Wideband Audio protocol standard, which provides for higher quality IP telephone calls.

8 YEARS OF IP PBX EXPERIENCE: 3Com and Cisco created the IP PBX marketplace in 1998. There are over 29,000 installations to date in over 40 countries.

SINGLE SOLUTION: 3Com is a networking company. As such it can provide a total end-to-end solution, including PBX, ethernet switching (including POE), wireless and security.

AFFORDABLE: 3Com is very cost effective

AFFORDABLE GIGABIT: 3Com can provide gigabit to the desktop at a very competitive price.

TOTAL COST OF OWNERSHIP: 3Com's system is vastly less complex than it's competitors. With simplicity come low costs.

EMBEDDED APPLICATIONS: Voice mail, unified messaging, call detail recording and CTI (computer telephone integration) ship with the system unlike competitors who nickel and dime you for every application.

OPEN ARCHITECTURE: 3Com recruits developers to build products to work with the NBX. Presently there are 22 companies that build products that work with the NBX.

EASY ADMINISTRATION: Bar none, the NBX is the simplest product on the market to administer.

EXPANSION: The 3Com NBX can scale to 1,500 devices, easily and affordably.
